

## Viewing Button Assignments

You can view programmable button (key) feature assignments.

### To view button assignments:

1. With the handset on-hook, dial **396**. PRESS THE KEY TO REVIEW appears.
2. Press any of the feature buttons to display the assignment.
3. Press # or  (Speaker) to exit.

## Resetting Programmable Buttons

You can reset all buttons (keys) that you have programmed to the default assignments. Resetting the programmable buttons does not reset button assignments programmed by the system administrator.

### To reset the feature buttons to the default values:

With the handset on-hook, dial **395**. FEATURE KEYS DEFAULTED appears.

## Programming DSS/BLF Buttons

You can use programmable buttons as Direct Station Selection/Busy Lamp Field (DSS/BLF) buttons. DSS/BLF buttons must be enabled by your system administrator.

After you program a DSS/BLF button, you can:

- Press the button to place a call to the assigned extension.
- Press the button and then hang up to transfer a call to the assigned extension. If the call is transferred to voice mail you hear repeating double tones.
- Visually monitor the call activity of the assigned extension.

The following table describes the lamp signals and the indicated call activity:

Lamp Signals	Description
Continuously Lit	The extension is busy or off-hook.
Slowly flashing	The extension is in Do-Not-Disturb (DND).
Quickly flashing	The extension has a call ringing in.
Continuously flashing	The extension is causing a "Station Off-Hook" system alarm.

### To assign a DSS/BLF button:

1. With the handset on-hook, dial **397**.
2. Press the programmable button, and then enter the extension number to be assigned to the button.
